

Used Oil Recycling in City of Memphis

Oil keeps our cars, lawnmowers, and many other machines running smoothly. But, once oil is used, it must be discarded properly to keep it from contaminating the environment. It is a violation of City Ordinance 4538 to improperly dispose of used oil into the storm water drainage system (storm drains, drainage ditches, etc.). It is estimated that up to 60 percent of the used motor oil generated by do-it-yourself projects end up polluting our lakes, streams, and groundwater when improperly disposed.

When bringing your used oil to any recycling facility, please ensure that it is put in a container with a tight lid and never mix the motor oil with any other chemicals such as paint, antifreeze, gasoline, etc. because the mixed fluids will make the oil unsuitable for recycling. Some locations may accept used oil filters, antifreeze and car batteries for proper disposal. Call the business to check.

Did you know that there are several locations in the Memphis area that accept used oil for recycling? Some locations are listed below. Should you encounter problems or if a listed location has gone out of business, please let us know by e-mailing stormwater@memphistn.gov or calling the Storm Water Department at (901) 636-4349. You can also visit www.Earth911.com to search for locations!
